WHAT YOU CAN DO TO HELP URBAN RENEWAL

Since Urban Renewal is basically a community undertaking, it is a program of direct concern to every citizen and organized group interested in the community's improvement and in the prevention of blight and slums where he lives. If you are a citizen or civic leader, you can help by:

(a) Arousing interest and understanding of the urban renewal needs in your community through personal efforts and civic organizations.

(b) Keeping informed through local agency officials, and the press on what is being done and is planned.

(c) Cooperating in educational and operational phases of urban renewal, such as block-by-block surveys, which require active support from civic-minded citizens.

If you are a businessman, particularly if you are in the field of

housing, financing or development, you can help by:

(a) Lending leadership and support to develop community programs to combat blight and slums.

(b) Coordinating your private business efforts with the overall community plan and program.

(c) Participating in specific efforts to plan, restore or rebuild blighted areas under the workable program.

If you are a local official, you can help by:

(a) Informing the community about urban renewal problems and needs.

(b) Coordinating your official efforts with those of business and citizen leaders.

(c) Formulating and initiating action to deal with urban renewal problems, and obtaining Federal help where needed.

SUNDAY SUBMARINES REFLOATED

The Board of Selectmen Monday evening reversed their vote to two weeks ago and granted a Sunday license to Sarah Black and Virginia MacFarland for their Silver Lake Sandwich Shop. The ladies recently opened the small business venture where they sell the popular sandwiches, tonic and coffee on a takeout basis.

After the refusal of the first application, a common victualers license, which provides seven day operation for restaurants, was applied for. The Board felt that under the law the granting of such a license was not justified as the products of the shop were not to be eaten on the premises.

A second application for a Sunday license was then voted on and granted. Selectmen Charles Black, Waver Drew and Nicholas DeFelice voted "yes". Donald Kidder abstained, and Chairman Frank Hagerty voted "no".

There were no injuries reported and only slight damage was done to each of the vehicles. The right front fender and bumper of Pellicchia's vehicle were dented along with the rear of the taxi.

Officer Balestrieri investigated the accident.

SPINAZOLA OFFERS TO BUY DISPUTED LAND

A letter from Atty. Timothy Kane, representing Clarence Spinazola, owner of the former Blue Hog Farm on lower Main St., was received by the Selectmen Monday evening.

Mr. Kane said that his client was interested in purchasing various lots of land located between his property and the Woburn line, ownership of which has been in dispute since 1893. The land was

subdivided into 25 foot lots at that time.

Mr. Kane said that if his client were allowed to purchase that land, and other parcels in the vicinity that the town has title to, an industrial area would be opened up by reclaiming the land.

Town Manager Alfred Calabrese said that he did not approve of the plan, as retaining the land fitted in with other plans that he has. He did not elaborate.

Wilmington Little League

Despite the interference of torrential rains on Tuesday and gathering darkness on Thursday, Little League activity was nonetheless exciting last week. Only the Chisholm Indians managed to play both of their scheduled games, winning Monday behind the three-hit shut-out pitching of Pete Emery, 8-9, over the Cain Red Sox and losing a seven-inning heartbreaker to the defending champion Unit Packet Tigers by a 3-2 count on Wednesday.

The Wednesday game featured the most exciting baseball play of the season. In the third inning, Johnny Robbins beat out a perfect squeeze but with the bases jammed to score the Tiger's first run. Jeff Williamson, Tiger pitcher, hit his second home run of the year in the fifth inning for what seemed to be an insurance run. However, the Indians came roaring back in the sixth when Tom Grant smashed his fifth home run of the year with a man on base to knot the score at 2-all and send the game into extra innings. It was here that the Tigers "Little Guy" took over. Singles by Johnny Robbins and Jim Collins, followed by a free pass to Billy Cawthron set the stage for Billy Ritchie's run the scoring, game-winning single to rightfield. Tuesday's game was called with the Wilmington Ford Yankees trailing the Tigers, 5-1, in the fourth inning, and darkness halted Thursday's game after six innings with the Red Sox and Yankees tied, 4-4.

In minor league action, the Tunney Redlegs spotted the Rotary Braves five runs in the first inning, then fought back for a 7-6 victory behind Ken Paglia. The McNamara Cardinals topped the Stevens Dodgers 10-3 to keep within striking distance of first place. Friday night's contest between the Joe Apps Giants and the Coombs Cubs was postponed because of rain.

The big game of the week in the Wilmington Little League took place on Thursday when the Unit Packet Tigers and Chisholm's Indians met head on for first place in the standings with the Tigers pounding out an 11-0 decision behind the two-hit pitching of Jeff Williamson who helped his own cause with a single, double and home run. Jimmy Newhouse collected both of the Indians hits as twelve of his mates went down via the strikeout route in the abbreviated five-inning game.

In other major league action during the week, the Wilmington Ford Yankees took a close one from Cain's Red Sox, 8-7, on Monday, led by Peter Collins' three hits. Billy Cotter picked up the win and Keith Arnold took the loss. The Yankees were on the short end of another close one Tuesday as the Indians won, 7-6.

After Jim Collins hit a three-run Yankee homer to tie up the game in the fifth inning, Tom Grant scored the deciding run in the final inning on some heads-up base running.

Wednesday's game found the last place Red Sox upsetting the first place Tigers by a 6-3 score. Frank Ingram's strong pitching and Joe Tennehan's three doubles highlighted the Red Sox performance. A sixth inning rally by the Tigers was nipped in the bud when Jack Gorden leaped high in the air to snare David Fuller's wicked line drive down the third base line to end the game. Saturday's minor league triple-header was featured by Ken Paglia's second no-hitter of the season as the Tunney Redlegs topped the Stevens Dodgers, 3-0.

Joe Apps' Giants maintained their second place standing with an 11-3 win over the Rotary Braves, and the McNamara Cardinals won the nightcap over Coombs' Cubs, 6-4. The remaining few weeks of the season should see plenty of exciting baseball, and while attendance at the games this year has been exceptionally high, there is always room for more.

community needs to do, and wants to do, for its own future welfare; many of the elements of a workable program are things the community is already doing, other things being done only part-way or ineffectively; still others are responsibilities that have been bypassed or neglected.

A workable program should include the following seven basic elements to be successful:

1. Sound local housing and health codes - enforced - an end to tolerating thousands of illegal, degrading, unhealthy substandard structures and areas where many people have to live in almost every American community.

2. A general "master" plan for the community's development; an end to haphazard, thoughtless planning and growth - a road map for the town's future.

3. Basic analysis of neighborhoods and the kind of treatment needed, an inventory of blighted and threatened areas to develop a plan of treatment to stop blight in its tracks.

4. An effective administration organization to run the program, coordinated activity toward a common purpose by all offices and arms of the local government.

5. Financial capacity to carry out the program, using community revenues and resources to build a better town for the future, instead of continuing to pay heavily for past mistakes.

6. Relhousing of displaced families, expanding the supply of good housing for all income groups, through new construction and rehabilitation so that families paying premium prices for slums can be rehoused.

7. Full-fledged, community-wide citizen participation and support - public demand for a better community and public backing for the steps needed to get it.

Add these seven basic points of community action together and the sum-total is a full-scale community Workable Program.

In the case of Wilmington, the basic elements will be adjusted to its needs.

Why is a WORKABLE PROGRAM necessary? - Because it's YOUR town, and it's your choice. Decay or growth in your community are your decision and your responsibility.

St. Thomas
Continues Drive
Toward Lawrence
CYO Title

Battling the elements as well as their opponents, St. Thomas' had a tie, defeat and two rainouts to show for last week's activities. The locals had a 4-2 lead against St. Monica's of Methuen when a downpour curtailed the contest after three and a half innings last Tuesday.

Thursday against Holy Rosary at Lawrence, Fred McAndrews gave up only four hits in his first pitching start as St. Thomas' battled to a 2-2 tie. Joe Bevilacqua had four hits.

After a Friday postponement, St. Thomas' went out of their age bracket in playing the Bedford Town Team at the High School Field on Sunday. The Tennenha-coached club was soundly beaten by the older and polished visitors. It is felt that the added experience gained from the contest will stand the team to advantage as they complete the last three contests in the Lawrence CYO league.

The next home game is Sunday at the High School Field against St. Raphael's of Medford.

St. Thomas' roster:
Catchers: E. Maegelin, McKelvey.
Pitchers: Frotton, Peters.
Infielders: Boudreau, D. Maegelin, Bevilacqua, Maloney, MacDonald, Palino, Bobine, W. Fuller, R. Zwickler.

Outfielders: Kavanagh, Gage, McAndrews, Ahern, Dromgoole, Dolan.

Fourth Not Quiet For Everyone

While most of the town be-moaned lack of excitement over the Fourth of July, at least one man felt that fireworks were close enough to him.

Officer Arthur Kelley of the Wilmington police department was twice called into action over the holiday weekend to investigate explosive problems.

Tony Zaccagnini of Middlesex Ave. spotted a foot long rocket head while passing the Common Saturday. He brought the object to Officer Kelley who finally tracked down an ordnance corps expert at Fort Devens who took the head for examination. At first believed to be live, the rocket was

later reported to be inert. Another call to Officer Kelley from Joseph Grinley of Brand Ave. sent the officer to round up a cache of RR signal caps that children of the area were playing with. The caps can be extremely dangerous if hit with force. They were turned over to station agent Tom Connelly.

Accident At Nichols Street

At 2 p.m. on Monday, an accident occurred at the intersection of Nichols St. and Shawsheen Ave. Both drivers were injured. Richard Young was treated at the scene by Dr. Fagan for lacerations of the leg and was taken to his home at 212 Andover St., Billerica in the fire dept. ambulance. Ora A. Swett of 116 Nichols St., needed no medical treatment at the scene, but stated he would see his own doctor.

Young was proceeding along Shawsheen Ave., toward Billerica behind a truck. Operator of the truck, seeing Swett coming out of Nichols St., applied his breaks. Young, thinking the truck driver was about to make a turn into Nichols St., pulled out to pass and collided with Swett as he pulled onto Shawsheen Ave.

Both cars were damaged on the front ends and were towed from the scene.

Chief Lynch, Sgt. Imbimbo and Officer Ellsworth investigated the accident.

FIRE FEEDS ON CARELESS DEEDS

Back once again and although there isn't very much to write about due to the cancellation of our meetings for the summer months I will try to bring you up to date as to the happenings around here.

Since talking to you last there has been no news on the ladder truck until just recently and all appearances and rumors the Bids for same were opened at the Town Hall on Thursday morning at eleven a.m. The bids for the C. D. Rescue Unit were opened and have been awarded to the Gildart Chevrolet Co. This unit will be housed here at the Station and available to the use of the Dept. It should prove to be quite a boon to us in many ways for I understand it is to be equipped with all the most modern rescue equipment necessary in most any phase of such endeavor. Hats off to C. D. Director Rene Larivee for the job he is doing in making this town one of the best C. D. equipped towns around this area. His dept., at this time have an ambulance, fire truck (pumper), a large mobile generator, two-way walkie talkie, and a communications set-up that is the envy of some of the surrounding towns, and now this rescue unit and frogman group that should make him very proud indeed, of his accomplishments in the interest of the Town.

During this period we also lost one of our men to private industry when Private Ray Dewhurst left the dept. to try it on the outside. All of us here though we miss him, wish him the very best of luck in his new endeavor. No one

has taken his place to this writing, anyhow. I wonder how he feels when he hears the whistle go now, and he doesn't have to make a run for it. Earl Baldwin has just joined the ranks on the call man list, glad to have you aboard, Earl.

Well so long for now and until next week remember that Fire is not the only thing that claims lives. This is the season for vacations, swimming and picnics. Play it safe all way round and caution the children about the hazards of going in the water too soon after eating. A family picnic is a grand way to enjoy a day in the great outdoors, protect that right by making sure your picnic fire is dead when you leave the woods.

THE LIONS ROAR

Last Wed. night saw the new slate of officers in position for their first meeting since their installation.

A note to all not to forget that this was a regular meeting and one of the two scheduled for the month of July. The summer schedule calls for two meetings a month. Would like to remind Ben and Harry to be there early so that they may be oriented in the meaning, etc. of Lionism. The two meetings a month will be for the months of July and August and we will resume the regular weekly meetings again the first of September.

There being no meeting last week the column this week is a little on the short side but then as they saw no news is usually good news.

King John is on vacation this week so I understand and rumor has it that he is out angling for some of those denizens of the deep, hope he has as good luck as I had last Saturday. The haddock and cod were biting very well off Nahant.

See that Frank H. is back from his vacation and looked a little bit on the sunburned side this morning.

If Oil Seekers Were Discouraged

Oil and gas wells ultimately wear out, become worthless and must be replaced. The search for new productive wells is an extremely expensive and risky enterprise. Only about one of nine wildcat wells drilled finds oil.

These facts are reflected in our tax laws, in what is known as the depletion allowance. The allowance is a credit against income taxes, and it is allowed producers only—not refiners, or other segments of the industry.

The allowance has long stood at 27½ per cent. Every so often efforts are made to reduce it. That has happened at this session of Congress, in the form of a proposed amendment to the law setting the rate at 15 per cent.

Then a significant event occurred. The Treasury Department made a report to Senator Byrd of the Senate Finance Committee opposing the amendment. It said: "Percentage depletion is a subject that must be appraised not only in the light of national policy affecting the development and preservation of natural resources. In view of the far-reaching implications of depletion allowances, any change should be considered only after full consideration of all its possible consequences. Accordingly, the Department believes that an examination of the entire subject with extensive Congressional hearings would be necessary to determine whether and the extent to which the rate should be changed."

What is at stake here is our future oil and gas supply at a time when demand is enormous. Last year, for instance, gasoline consumption reached another all-time peak—an incredible total of 57,402,000,000 gallons. It doesn't take much imagination to anticipate what would happen if depletion allowance was so reduced that the risk of loss outweighed the chance of gain, and producers were discouraged from seeking new supplies.

"The Big Giveaway"

Our American system of free enterprise was founded on the idea that the government should do for the people what they can do for themselves. And yet, time and time again, it is said that the people's resources are being "given away" when a private company is licensed to build a dam and a power plant. But what can be given away when all the utility company gets is the right to produce electricity at rates which are regulated by the people themselves?

The government cannot produce a dam by magic. Federal projects cost the same as private projects, and generally more, due to political influences. Over this years, the American tax payers have invested \$1,614,302,195 in the TVA system. From this investment, the public has received no income at any time. No Federal income taxes are paid. TVA does make certain payments to local and state governments "in lieu" of taxes. But those amount to only 3.88 per cent of gross revenues in 1957. Private companies paid 22.7 per cent of their gross in taxes in the same year, for a total of \$1,100,000,000.

Just who is giving away what? According to the Federal Power Commission, \$100 billion of new capital will be invested in electric power plants in the next twenty years. It is up to us, the people of America, to decide how this investment is made—by taxing private investors, or by bureaucratic, tax-eating public authorities. The real big "giveaway" lies in the destruction of our American private enterprise system, and the undermining of our freedom. In giving away our rights as private citizens we are giving away the American heritage.

On July 30, 1942, President Roosevelt signed into law a bill authorizing enlistment and commissioning of women into the Navy and Navy Reserve.

Health For All

Remember the old verse about the purple cow? It ended "I'd rather see than be one." But now a veterinarian comes up with a different point of view. As far as tuberculosis is concerned, he says, today it's "much safer to be born a calf than a baby in America." This is the way Dr. Paul S. Dodd sums up the comparative progress in eliminating bovine and human tuberculosis.

Years ago TB was the most serious animal disease the American farmer had to deal with. In 1918 a cooperative campaign for the eradication of bovine TB was begun. The plan was to give all cattle the tuberculin test—the skin test that shows tuberculosis infection even though active disease may not be present. All cattle found to have positive reactions were to be slaughtered. You may never have been a farmer, but you can imagine how difficult it must have been to face the destruction of valuable animals for the general good.

By 1936 more than 17 million cattle had been tested and more than 3,000,000 had been slaughtered. By 1956 only one and a half per cent or 14,000 of the cattle tested had positive reactions to the test.

But in the same year 14,000 human beings died of tuberculosis and there were about 800,000 active cases of the disease.

The tuberculin test is just as easily applied to people as to cattle. With the evidence of a positive reaction, it's often possible for health workers to find the source of the infection—the active case of TB that is spreading germs. And, of course, extra care can be taken to protect the health of the reactor to prevent the development of active disease.

Such programs have been conducted in Lincoln, Sudbury, and Stoughton and possibilities for Association to offer as much safety to humans as we do to our

HEALTH FOR ALL

The Gourmet's Delight

"Take a wolf's liver boiled in thin wine, bacon of a sow fed on herbs and the flesh of a she-donkey. Eat with the broth."

A Cordon Bleu Casserole? No. An ancient Roman cure for tuberculosis.

Recipes for TB cures can be found in the records of every civilization from ancient to modern times. The theory seems to have been the more ghastly the medicine, the more likely the cure.

They all start with exotic ingredients such as these: "Take a peck of garden snails... take a tree frog... take a vulture's lung."

It's possible that some people who took these medicines got better. Otherwise the recipes wouldn't have been preserved. Occasionally, people do recover from TB without any treatment, so good results were probably pure coincidence.

Modern treatment of TB doesn't depend on coincidence. When a research scientist gets a clue to a substance that may have an effect on tuberculosis, he tests it in many ways before it is used on human beings. The drug has to show its effectiveness against TB germs in test tubes. It has to be proved safe on laboratory animals.

It has to be tested over a long period of time, to be sure that there are no bad effects after its use, and that its effectiveness will last. It is used under careful supervision on thousands of patients before it is released for general use.

Scientists have developed several effective drugs which help cure TB patients. There is not yet one ideal drug that will cure every case. There may never be one. Research continues for more and better drugs, thanks to your Christmas Seal contributions and federal grants. According to the Middlesex Health Association and its affiliated local committees, no possibility is overlooked—not even the wolf's liver. It may hold a cure.

It Could Be You

When you see a fire engine go roaring by, you may wonder for a second or two "can it be headed for my house." Then you dismiss it from your mind. You might not be so complacent if the figures on fire losses were placed before you in big red letters.

During 1956, there were 865,561 reported fires in communities of 2,500 or more population which means that a fire started every 37 seconds.

Almost everything you own, from a house down to a dishpan costs twice as much today as it did comparatively few years back.

In most cases, even though you are carrying double the insurance you carried 15 years ago, you would still be out of pocket in replacing the things destroyed by fire. Your best protection is to see that every possible hazard around your property is reduced to the minimum. It is cheaper to call in an electrician or furnace man to make needed repairs and replacements than it is to call the fire department.

The court inquires carefully into the necessity of attaching the weekly earnings of an employee before such permission is usually granted. It is also the law that an attachment of wages is effective only against that sum of money which is earned, due, owing and payable to the employee at the precise moment that the trustee process is served by the sheriff. Attaching creditors, therefore, usually make it a practice to
